Chi Che Wang Park Design
2828 N. Hermitage Avenue
Services provided: Civil Engineering

Chi Che Wang Park is a 1.7-acre park developed on a reclaimed industrial site in the Lake View Community Area. Phase I services for “clean and green” were undertaken under another contract. Phase II design goals were to develop an engaging, attractive, safe and accessible park environment for the rapidly developing residential area that surrounds the park site.

Site Design Group, Ltd. developed conceptual design and final design to develop this site into a neighborhood park. Delta Engineering provided civil engineering services for site drainage containment and installation of utilities.
